

Dr. Donald L. Paul

Donald Paul is the Executive Director of the USC Energy Institute, Professor of Engineering, and holds the William M. Keck Chair of Energy Resources at the University of Southern California. Dr. Paul had a distinguished 33-year career with the Chevron Corporation, retiring in June 2008 as Vice President and Chief Technology Officer. During his career, he advanced through positions of increasing responsibility in research and technology development, exploration and production operations, and executive management, including appointment as the president of Chevron's Canadian subsidiary.

Dr. Paul currently serves as a Senior Advisor at the Center for Strategic and International Studies in Washington D.C. and in 2014, was re-appointed by the U.S. Secretary of Energy to the National Petroleum Council. He participates in advisory roles at several universities (including MIT, Harvard, Stanford, Rice, and the University of Texas), governments, national laboratories, oil and gas companies, utilities, technology companies, and venture capital firms. He is frequently recruited to speak at national and international forums on the future of energy, the security of energy systems, intelligent energy infrastructures, and energy careers. He holds B.S., M.S., and PhD degrees from MIT and an honorary doctorate from the Colorado School of Mines.
